Artist's Statement:

I prefer art that is unique, thought provoking, full of intrigue and mystery. There is excitement in creating art that is original and out of the ordinary. There is a great sense of fulfilment in producing art that is openly admired by all who view it.

Biography:

All my life, I have always been "artsy." Pencil sketching and mixed media forms of art interest me a lot. All my work, so far has been for fun and given away to friends and relatives. Over the years, I have also dabbled in calligraphy. My recent interest in rock and stones medium has become my passion.

Resume:

Sketched portraits of my colleagues at the General Campus of The Ottawa Hospital are on permanent exhibition at the waiting room of the Department of Neurophysiology.
